

Technology Committee Minutes – 10/17/12

Present: Rich, Tomenchok, Olsen, Heller, Beaumont

Absent: None

Other: Cathy Urbanski, Steve Wolock

Technology Focus Areas: Committee discussed the following item:

- Website: Committee reviewed the proposal provided by Steve Wolock to migrate the current website framework to a Wordpress based framework. Steve demonstrated Wordpress and how he would propose using it. A subsequent discussion ensued as to the work effort required to migrate the current website content into a Wordpress based frame, which is not included in his proposal/cost. That work would need to be performed by township employees or volunteers, or individual committee members. Ultimately everyone agreed that effort might be an unreasonable load and instead requested Steve provide a quote to both fully develop and support a new website. Target was to provide proposal by 10/24
- Wifi capability/ Audio Visual Media: Zach reported that wifi has been set up in the TC building. It currently is unencrypted and open for public use within the building.

Next meeting: TBD
