## New Proposed Route

PennEast released maps of yet another route. This route indicates all of the interconnects with other pipeline infrastructure and highlights the spider web of pipelines that will soon traverse our lands under our feet if we don't continue to act. Although they can still comment to FERC, since the environmental scoping period is over, new stakeholders have little say.

[View an interactive Map](#)

## SIGNS!

If you don't have a **Stop**

## Greetings Friends

*Our first newsletter is a long one...please read it all! Note that at the bottom of this newsletter, you can update your email address, forward to friends (their email address will NOT be recorded), and opt out of these emails. We hope you will not opt out. This information is so important.*

The comment period for FERC's Environmental Impact Statement closed on February 27th. Local in-person FERC meetings were packed to capacity and most comments were AGAINST the pipeline. Citizens provided exhaustive research and detailed objections to the route. Experts, landowners and community citizens raised valid concerns about the environment, threats to our water, safety and flood hazards.

[Watch videos of official citizen comments.](#)

PennEast trivialized those in-depth comments with boilerplate responses. Lumping various distinct comments into groups, they responded with generalized platitudes which were the equivalent of saying...don't worry...we'll get it right. Citizens who will be most affected by this pipeline were not only disappointed, but insulted.

### Car Magnets Too!

There are now Stop PennEast car magnets available...tell everyone while you drive! And it's removable.

Get your magnet at  
The Supernatural Salon in Riegelsville.

### Keep Commenting!

#### Keep Sending FERC Comments

Although the EIS comment period has ended, this is not the time to stop commenting to FERC. We need to redouble our efforts and comment on the new maps. Also bring up the evidence that leads to the conclusion that the gas the industry wants to force through our communities by usurping our land via eminent domain is **ultimately meant for export**. The grounds for public need for this project must be questioned.

There are instructions in the documents section of [stoppenneast.org](http://stoppenneast.org) that can assist you in navigating the FERC website.

#### Comment to the Delaware River Basin Commission

Delaware River Basin Commission (DRBC), tasked

## PennEast Interconnects Show Probable Export

The industry itself says

**"Cove Point will export *Marcellus Shale gas*. In fact, 100% of whatever the plant can liquefy and ship on a daily basis is already spoken for by two countries that desperately want and need it: Japan and India."**  
(emphasis ours)

From [Marcellus Drilling News](#)

Penneast claims it is not intended to export "as of now" yet the proposed route interconnects with other pipelines along the route through PA and NJ which are clearly headed toward ports.

[Download pdf of this map](#)

PennEast interconnects include:

- Regency Energy Wyoming Interconnect in Dallas Township, Luzerne County
- Williams Partners Springville Interconnect in Dallas Township, Luzerne County  
*The Springville pipeline connects Williams Partners' growing gathering system in northeast Pennsylvania with its Transco interstate gas pipeline, moving 300 million cubic feet per day (MMcf/d) of natural gas.*

**[See this article.](#)** Nowhere does not say *Liquid Natural Gas* (which is exported), but "LNG" is a keyword

by the federal government with protecting states that border the river, determined that the PennEast Pipeline Project would be subject to DRBC jurisdiction and will need to obtain a docket before it can proceed with its plans.

[See DRBC contact information here.](#)

### Resolutions Opposing the PennEast Pipeline

37 municipalities and organizations have signed resolutions opposing the pipeline, including:

## Foreign interests in LNG Ports and Marcellus Drilling operations

### [From the Sumitomo Corporation web site:](#)

Sumitomo Corporation and Tokyo Gas, through their subsidiaries, established the joint venture company ST Cove Point LLC in order to carry out contracted natural gas liquefaction processing and liquefied natural gas sales for the Cove Point LNG Project in the US state of Maryland. The Project aims to procure US-produced natural gas through Pacific Summit Energy, a wholly-owned subsidiary of Sumitomo Corporation, and export about 2.3 million tons per year of LNG liquefied by Dominion Cove Point LNG (Dominion), the operator of the project. A license for exporting LNG to countries with which the US has no free trade agreement was obtained from the US Department of Energy in September 2013, and Dominion plans to start commercial operations in 2017.

**Sumitomo has received approval from the U.S. Federal Energy Regulatory Commission (FERC) to site, construct and operate facilities for the liquefaction and export of domestically produced natural gas.**

[Read more here.](#)

Sumitomo also owns many acres of Marcellus Shale in Pennsylvania. **[In 2010 alone, they purchased more than 90,000 acres, including at least 20 wells.](#)**

[Read more about the "joint venture" between Rex Energy and Japan's Sumitomo Corp.](#)
